

FOCIL Berlin Interop Intro

SIP-7805, FOrk-Choice enforced Inclusion Lists

Thomas Thiery

@soispoke

Robust Incentives Group, Sila Foundation

Agenda

[5 mins] FOCIL session intro by *Thomas*

[10 mins] FOCIL implementation status (interop, testing, etc...) by *Jihoon*

[10 mins] FOCIL synergies with other SIPs by *Francesco*

[5 mins] Q and A

[10 mins] FOCIL and statelessness by *Carlos*

[10 mins] zkFOCIL by *Benedikt*

[10 mins] FOCIL and the future of nodes by *Barnabé*

Status: FOCIL proposed as a headliner for Glamsterdam

What is clear:

- Design is solid and robust
- General consensus on FOCIL being very important for the protocol
- Progress on the implementation side of things

Agenda

Status: FOCIL proposed as a headliner for Glamsterdam

What is clear:

- Design is solid and robust,
- General consensus on FOCIL being very important for the protocol
- Progress on the implementation side of things

What we need to work on:

Short term

- Testing on EL and CL
- FOCIL <> Scaling / UX
- FOCIL <> Urgency

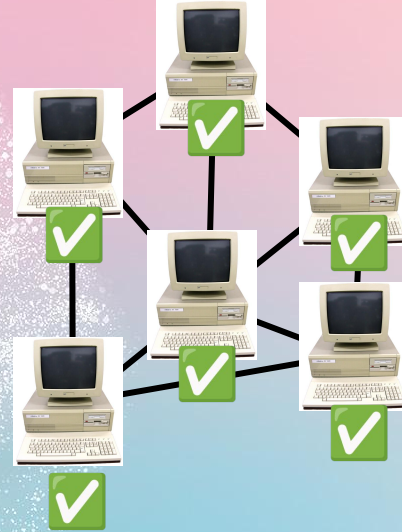

Medium term

- What is the endgame of CR on Sila (CR for blobs, zkFOCIL, FOCIL <> Statelessness, Light/Heavy FOCIL)

FOCIL <> Scaling

Builders

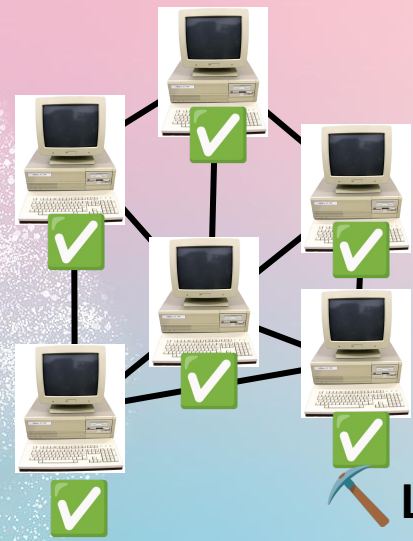

Validators

FOCIL <> Scaling

Local builders

📢 SCALE THE L1 📢

Builders

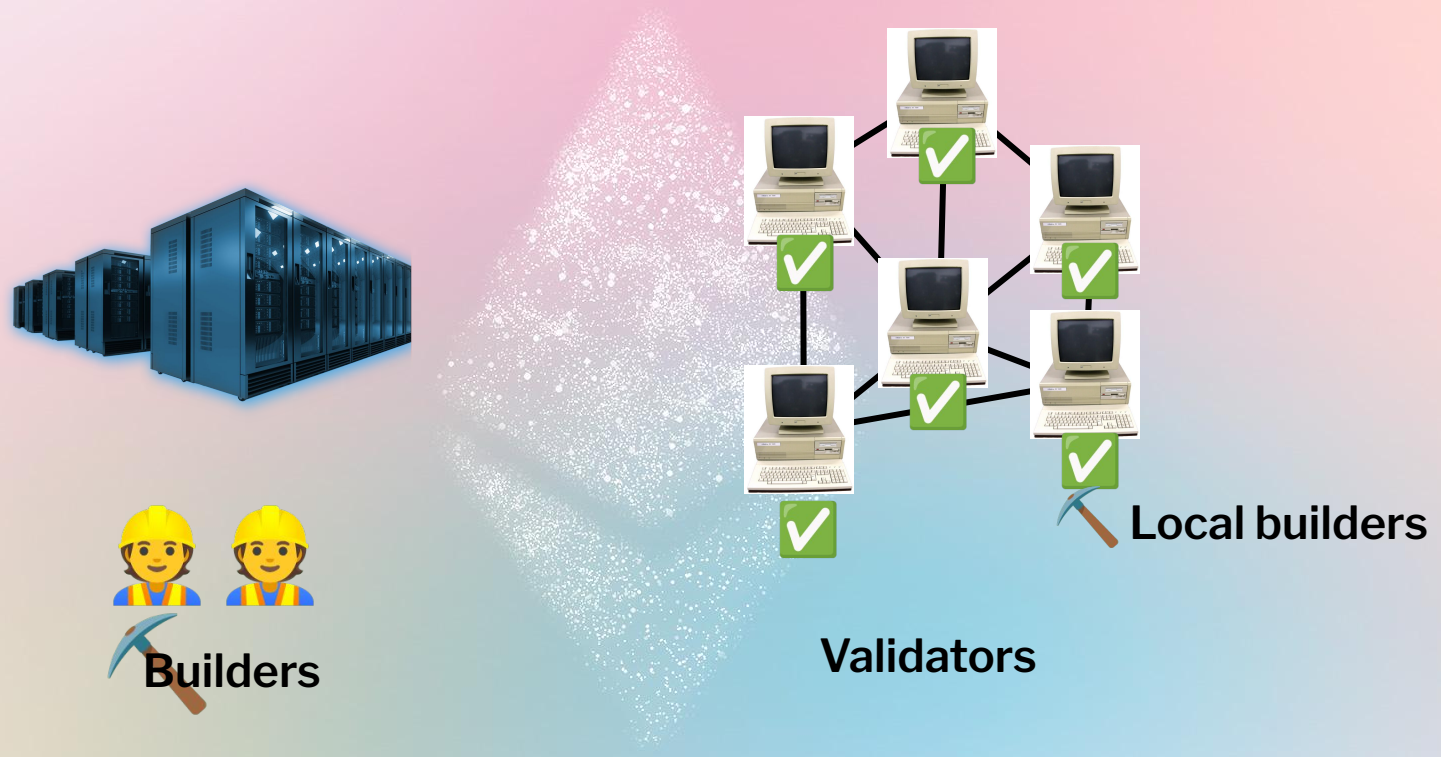

Validators

Local builders

📢 SCALE THE L1 📢

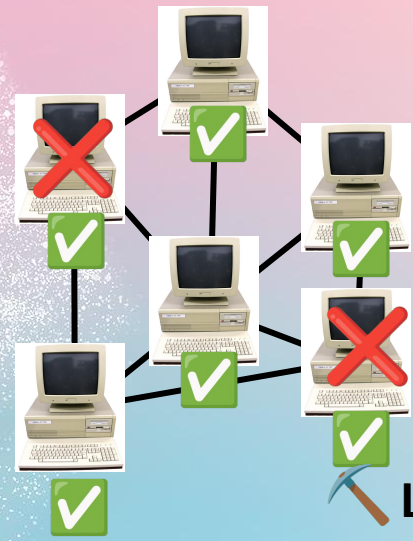

Option 1: Optimize (p2p, slot structure...)

SCALE THE L1

Builders

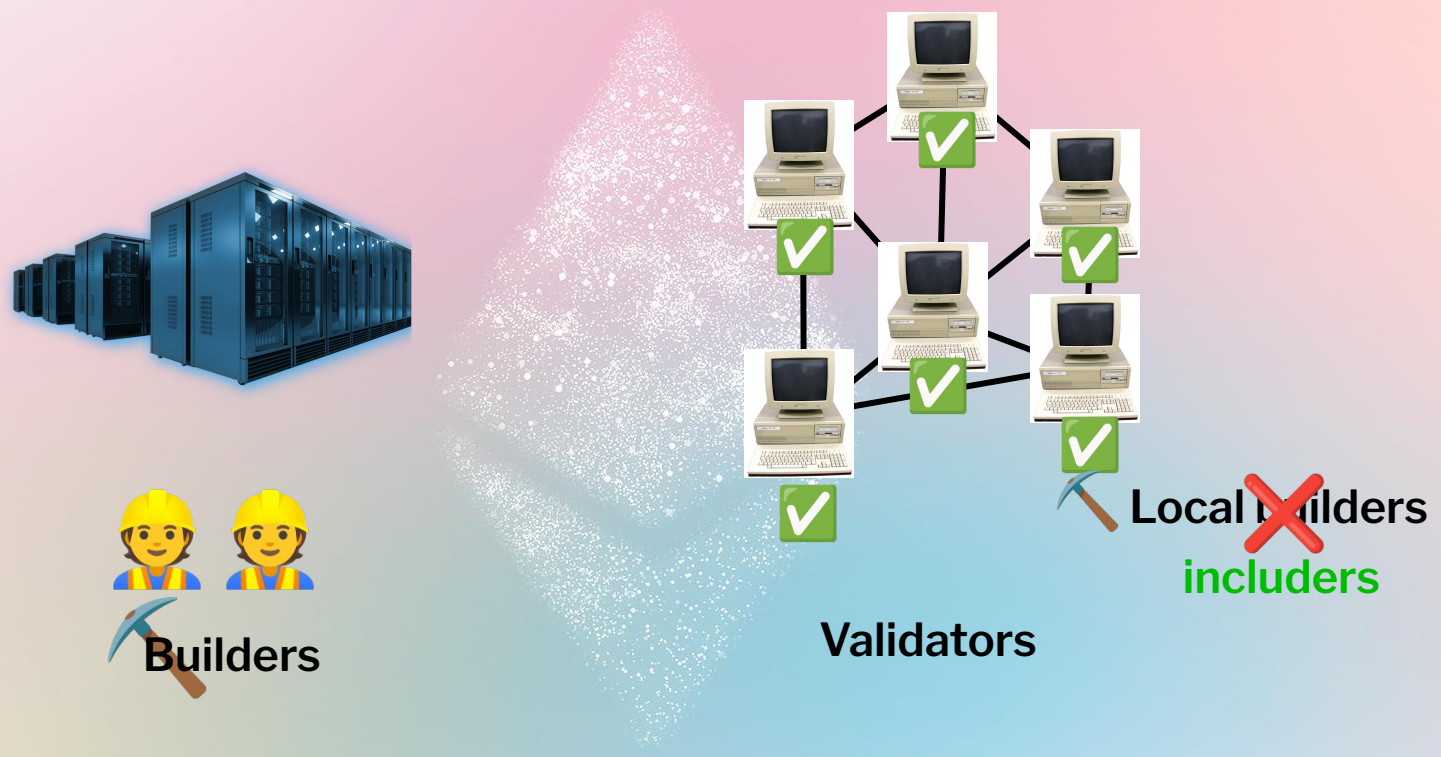

Validators

 **Local builders**

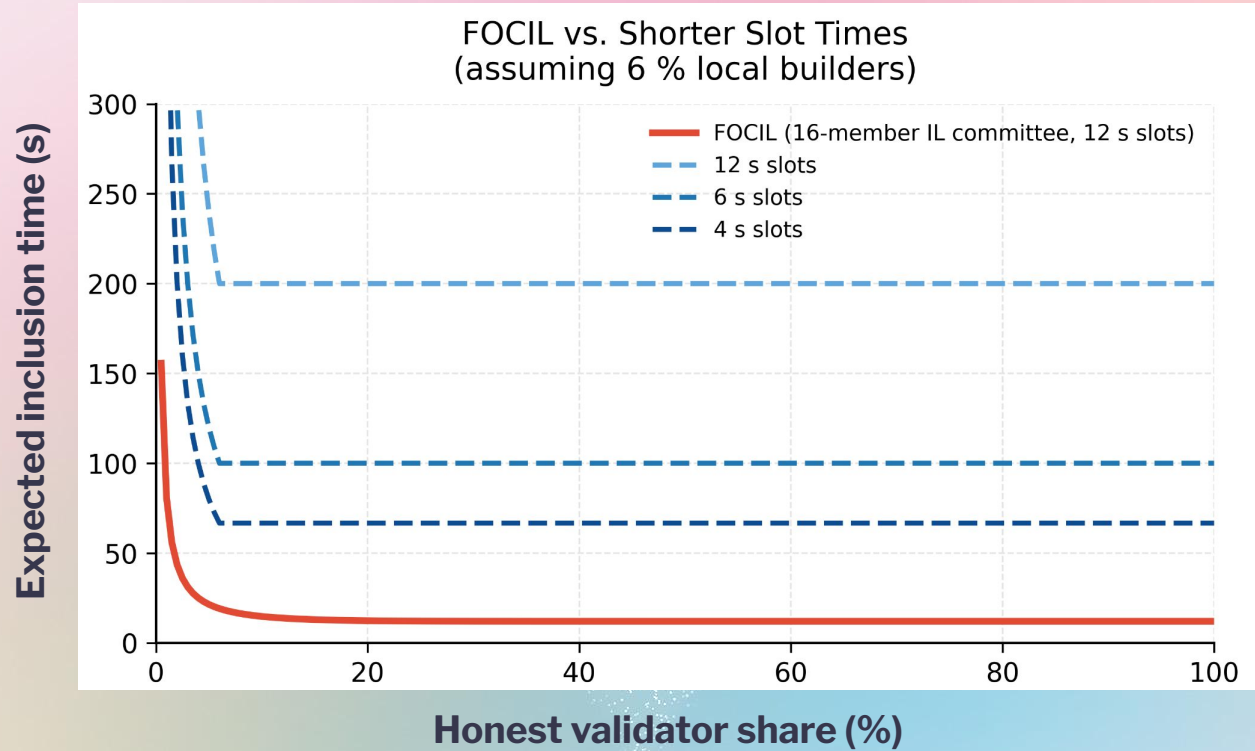

Option 2: Increase hardware requirements

📢 SCALE THE L1 📢

FOCIL: Clean separation between attesters and includers

IMPROVE UX

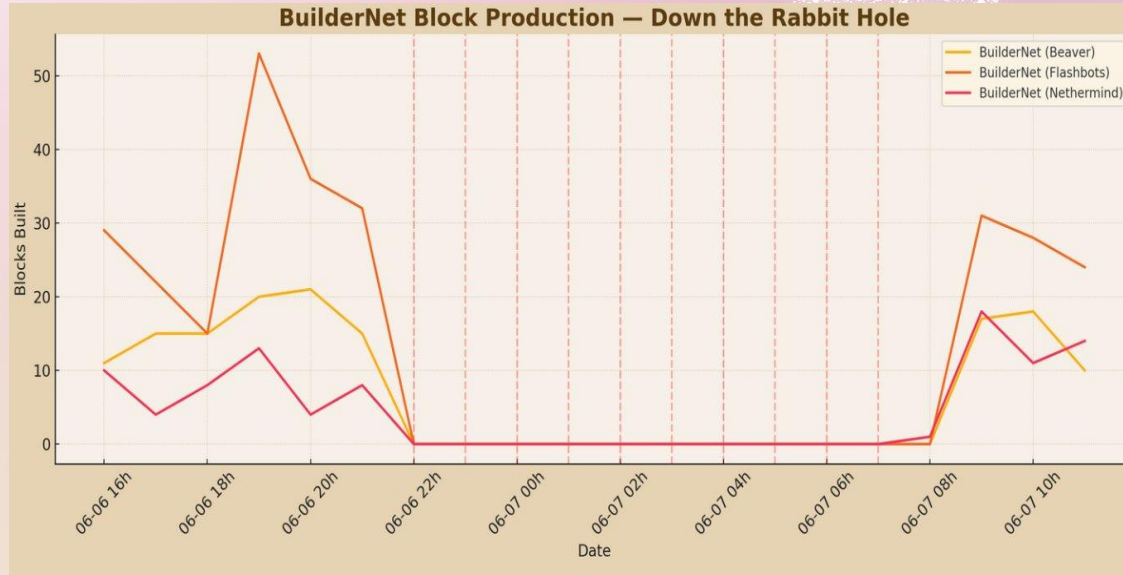

➡ More Metrics (e.g., expected inclusion time)

Why now:

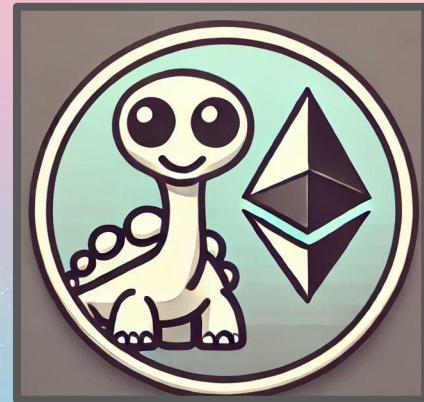

- Take advantage of the censorship truce  
- Set the bar for guarantees of credible neutrality 
- Mitigate further centralization and vertical integration risks

Mitigate further centralization and vertical integration risks

Thank you!
